Optimized Applicant Journey

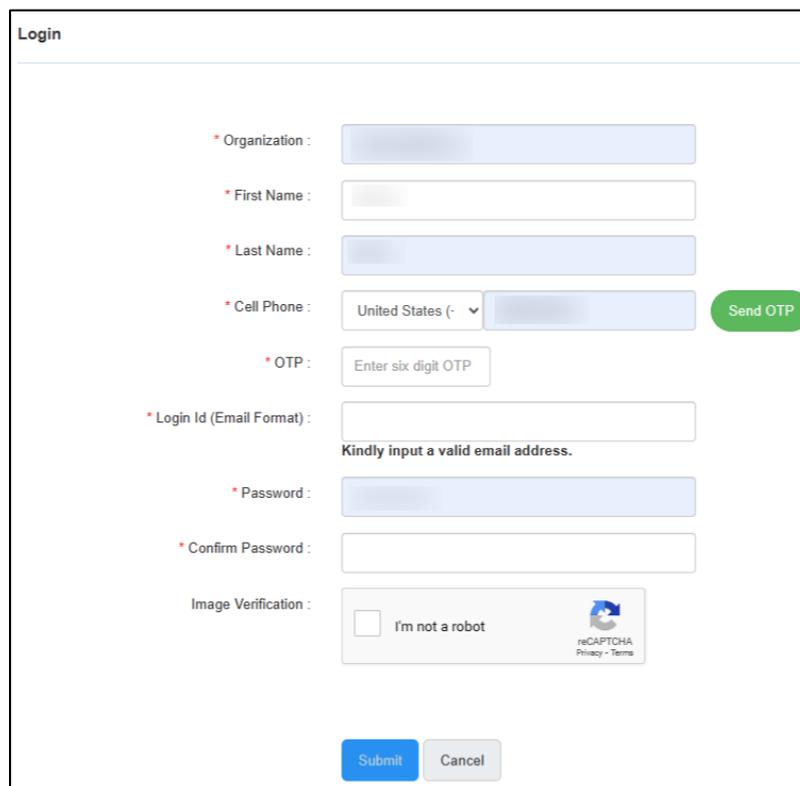

1. "Secure AUTH" Feature for Enhanced Registration!

Welcome to our streamlined registration process, where security meets convenience! When creating a user account on our registration page, applicants now enjoy an additional layer of authentication through the introduction of an OTP (One-Time Password) option. Upon entering their cellphone number, the system prompts applicants to input the OTP received on their mobile device. This added step enhances the authenticity of user accounts.

Furthermore, we have integrated an email verification field into the registration process. Applicants are required to input the code sent to their email address, providing an extra level of validation for their identity.

For ease of use, the OTP option is configurable based on your preferences. If this feature is not enabled on your site, kindly reach out to CommunityForce support by submitting a ticket on Zendesk for more details.

To guide you through the process of creating or editing a user account, we recommend checking out our comprehensive guides tailored for grants and scholarships. For grants, [click here](#), and for scholarships, [click here](#). Experience a secure and straightforward registration journey with our enhanced authentication features.

The screenshot shows a "Login" form with the following fields and elements:

- Organization**: Text input field.
- First Name**: Text input field.
- Last Name**: Text input field.
- Cell Phone**: A dropdown menu for country (set to "United States") and a text input field for the phone number. A green "Send OTP" button is located to the right of the phone number field.
- OTP**: Text input field with the placeholder "Enter six digit OTP".
- Login Id (Email Format)**: Text input field with the error message "Kindly input a valid email address." below it.
- Password**: Text input field.
- Confirm Password**: Text input field.
- Image Verification**: A checkbox labeled "I'm not a robot" next to a reCAPTCHA widget. The reCAPTCHA widget includes a circular refresh icon and the text "reCAPTCHA Privacy - Terms".

At the bottom of the form are two buttons: "Submit" (in blue) and "Cancel" (in grey).

Please check your email for a verification code.

2. User Security

We have made a notable advancement in our security measures. To ensure your accounts remain safeguarded, we've seamlessly integrated Google ReCAPTCHA into our login and the forgot password screens. This strategic addition is tailored to discern between genuine human access and automated attempts, heightening the security of your confidential information. The CAPTCHA will be displayed on the login screen following three consecutive unsuccessful login attempts by the user.

Image verification Required

[Forgot Password?](#)

In our ongoing commitment to fortify the security of your accounts, we've implemented an additional layer of protection for password reset requests. Now, when you utilize the "Forgot Password" link to reset your account credentials, our enhanced security protocol demands an image verification step. This means that along with the standard password reset process, users will encounter a Google ReCAPTCHA challenge, adding an extra shield against automated or malicious attempts.

3. Tailored Registration Experience

In our continuous effort to provide users with a more flexible and user-friendly registration experience, we're excited to announce a significant update. The Country Code and Cell Phone fields will now be set as optional during account creation on the registration page and when administrators create user accounts from the setup user screen. This means that users have the freedom to decide whether they want to provide this information during the registration process.

Unless explicitly configured to be mandatory, users can now complete the registration or have their accounts set up by administrators without entering Country Code and Cell Phone details. This update aims to streamline the account creation process, offering users more control over the information they share.

We understand that preferences vary, and this change ensures a smoother and more personalized registration experience for all users. Embrace the flexibility and ease of account creation with our updated registration process!

Login

Once you create a user account and begin an application you can save your work and return later to finish. All applications must be submitted by the deadline dates. You will not be able to submit your application after the deadline has passed. It is important that you review each section of the application making sure no information is missing.

Do not hesitate to contact us if you have questions. Good Luck!

* Login Id (Email Format) :

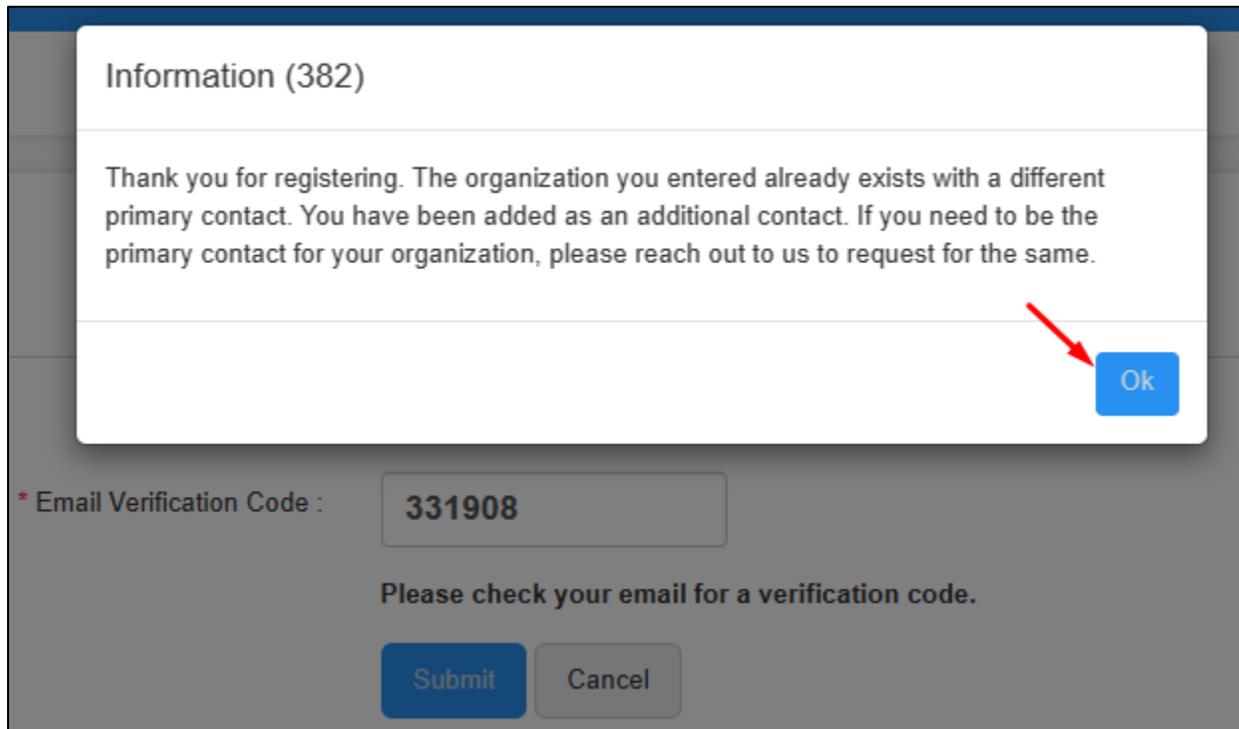

Kindly input a valid email address.

4. Organization Notify

Introducing "Organization Notify," a dynamic feature that strengthens organizational communication! When an additional user creates an account within the system under the same organization name as the Primary User, Organization Notify ensures that Primary Users stay informed and engaged.

With Organization Notify, a tailored email notification is automatically dispatched to the Primary User, delivering real-time updates about the new user account creation. This feature serves as a powerful tool for maintaining organizational cohesion and fostering collaborative efforts in the realm of grants.

To explore the intricacies of how the Primary User receives these email notifications, [click here](#). Admins, take control and customize these email notifications by [clicking here](#).

5. Organization Selection for Applicants/Manage Organization

Experience a smoother registration process for the applicants. When applicants register for a user account, they are prompted to effortlessly choose their organization from a predefined list. This eliminates the hassle of manual input, ensuring accurate and pertinent organization names during registration for grants.

Site administrators and grants administrators have complete control, allowing them to manage, control, and expand the list of available organization names. Empower administrators to seamlessly add organizations, enabling users to associate their accounts with the correct organization effortlessly.

Should a user not find their organization in the list, a simple solution is in place. Users can contact the site administrator or grants admin to have their organization added, ensuring accessibility for all organizations. Simplify and enhance the user experience while maintaining the accuracy of organizational names. [Click here](#) to discover how "Organization Selection for Applicants/Manage Organization" makes user registration a breeze!

To enable this feature on your site and enhance user experience, please reach out to CommunityForce's Client Support by submitting a ticket on Zendesk.

6. Streamlined Submission Experience

We've revamped the user interface to enhance the applicant's form-filling experience. The "Submit" button and confirmation checkbox, previously located at the top and bottom of the section, have undergone a strategic relocation – they are now exclusively positioned at the bottom of the screen.

This update is designed to streamline the user's interaction with forms, placing the essential submission elements within easy reach as they navigate through the application. Now, as the applicant complete your entries and reach the end of the form, they will find the "Check" button and confirmation checkbox conveniently waiting for their attention at the bottom.

Elevated Application Build Experience

1. Streamlined Access for Administrators for Managing Applications

We've refined the navigation experience to provide you with quicker access to essential information. Clicking on the application name will now seamlessly transport administrators to the "Manage Applications" screen, offering a centralized hub for overseeing and managing individual applications.

On the other hand, clicking on the application count will navigate administrators to the "Application Graph" screen, providing a visual representation of application metrics and trends. This strategic differentiation ensures a more intuitive and efficient navigation experience, allowing administrators to swiftly access the specific tools and insights they need.

Reporting

1. Overview of Global Ad Hoc Reports

We've enhanced the Global Reports feature, providing you with more control and flexibility. Introducing the "Filter by Application" option, a powerful tool that allows you to tailor your reports according to your specific needs. Now, within the Global Reports section, you have the ability to choose whether you want to include active applications, archive applications, or both in your reports.

To guide you through this feature, we've created a comprehensive overview. [Click here](#) to explore the Overview of Global Ad Hoc Reports and unlock the full potential of this new functionality.

2. Export to Excel on Automated Scoring Report

Exciting news for users of our Automated Scoring Report feature! We're thrilled to introduce a new enhancement that adds a layer of convenience to your workflow. Now, with the latest update, the Automated Scoring Report comes equipped with an export-to-Excel option. This means you can seamlessly transfer and organize your scoring data with just a few clicks.
